## **Maintenance Center**

### **MEMORANDUM**

**To: All District Employees**  
**From: Paul Brisette**  
**Date: December 17, 2020**  
**Subject: Lead in Water Testing**

---

The New York State Department of Health is requiring lead in the water testing in 2020. Due to the current circumstances, the Health Department has extended the deadline to this requirement until June 30, 2021. This Lead Testing requirement is very similar to the mandate completed in 2016.

First Draw Water Samples will be collected and sent for analysis on outlets used or potentially used for drinking or cooking. The District has reviewed and identified outlets that will need to be tested. Any sample with analysis over the action level (15 micrograms per liter or ppb) will have remediation action completed. This remediation will be completed according to the remediation plan created by the district. This information can be found on the Districts Website under Maintenance.

All sample results will be posted on the Districts Website, will be sent to the local Health Department and the New York State Education Department.

The District is committed to keeping our staff and students safe.
